

VICTIM RETAINS C. NORRIS LAW GROUP FOLLOWING ASSAULT BY PROMINENT RAPPER CARDI B

A female concert attendee and assault victim has retained Chicago attorney Cierra Norris to represent her for injuries and harassment following a videotaped assault by the artist only days after a similar assault on her own DJ.

Several videos of the incident and attack have been posted to social media forums showing artist Cardi B inciting fans to throw water at her during her performance, and then singling out the female victim before striking with her microphone. Additional videos have also surfaced showing the artist throwing her microphone at her own DJ just days prior to this similar attack, and illustrating a pattern of violence occurring at her live shows including attacks on other audience members.

The victim of the assault and battery is seeking to hold parties accountable for the preventable assault, including Cardi B, and for the unwanted notoriety she has suffered as a result of this incident. At this time, our client has not given a statement to authorities, nor have we communicated directly with legal counsel for any of the parties involved in the event and incident, however this legal representation seeks to open a direct dialogue with those involved, and find a resolution that maintains the respect and dignity of those affected. This representation also seeks to shine a light on the problematic nature of social media “journalism” and click bait culture, and the significant and harmful effects it can have.
